Smart Parking Platform – Project Management Plan

WE ARE Software Corp. has been commissioned to design, plan, and deploy the Smart Parking Platform, an integrated web and mobile solution that enables drivers to locate, reserve, and pay for parking garage spaces in real time. The platform streamlines operations for parking facility managers while reducing urban traffic congestion for drivers

Business Need & Problem Statement

Drivers in high-density urban areas spend an excessive amount of time searching for available parking, which can lead to :

- Increased Traffic Congestion
- Driver Frustration
- Lost Productivity

Project Scope & Core Deliverables

- Driver Apps
- Dashboard

Project Constraints & Assumptions

- Unlimited Development Budget
- Fixed Timeline

Project Success Criteria

- Time Savings
- Onboarding
- System Availability
