Smart Parking Platform – Project Management Plan

Part 5: Team Organization & Resource Allocation

Organizational Structure & Engineering Teams

	ORGANIZATIONAL STRUCTURE MATRIX	
	[Project Lead]	
Application Teams - Mobile App Team - Web App Team	Core System Teams - Backend/API Team - Mapping & Location	Integration Team - Payment Team - QA & Testing

Roles & Responsibilities

Mobile Application Team: Builds iOS and Android client apps, including real-time parking maps, booking flows, and push notifications.

Web Application Team: Develops the responsive web application for drivers and the administrative dashboard for parking operators.

Backend/API Team: Manages database architecture, server infrastructure, real-time availability sync, and core business logic.

Mapping & Location Services Team: Integrates third-party GPS navigation APIs, geofencing, and map overlay layers.

Payment Integration Team: Implements payment gateway APIs, secure digital receipt generation, and PCI-DSS compliance mechanisms.

Quality Assurance & Testing Team: Executes automated unit tests, end-to-end user journey tests, security audits, and regulatory checks.

RACI Matrix

(**R** = Responsible, **A** = Accountable, **C** = Consulted, **I** = Informed)

Major Project Activity	Mobile Team	Web Team	Backend Team	Mapping Team	Payment Team	QA Team
User Auth & UI Design	R / A	R	C	I	I	C
Real-Time Map Integration	R	R	C	R/A	I	C
Payment Gateway Setup	C	C	C	I	R/A	C
Operator Analytics Dash	I	R/A	R	I	C	C
Compliance & Security Test	C	C	C	C	C	R/A

Resource Allocation & Collaboration Framework

Staffing Strategy: Full-time dedicated engineers are assigned across all six teams simultaneously to enable parallel development.

Cross-Team Integration: Weekly syncs occur between the Mapping, Payment, and Backend teams to ensure seamless API contract alignment.
